

# Upcoming conferences in algebraic geometry

Here is a list of upcoming conferences involving algebraic geometry. For more information, check on google. I intend to keep this list vaguely up to date, but I make no guarantees. Please help me keep this current. (I tend to update it roughly every month unless someone gives me information directly.) It certainly isn't complete. My definition of algebraic geometry is broad, arbitrary, and changes with time. (Kiran Kedlaya maintains a [similar list in arithmetic geometry](#).)
